Certificate

DATABIZ CONFERENCE 2024
Theme: "Equipping Tomorrow's Innovators with Data Science, AI, and Business Analytics"
Organized by Batangas Information Technology Society (BITS)

BITCON 2025 – Batangas Information Technology Conference
Theme: "Building a Connected Tomorrow: IoT Innovations and Beyond"

Objective

A goal-driven and detail-oriented Information Technology student majoring in Business Analytics at Batangas State University – The National Engineering University. Eager to apply academic knowledge and technical skills in data analysis, programming, and business intelligence to support data-driven decision-making. Seeking an entry-level Business Analyst position where I can contribute to business insights and continue developing my skills in a collaborative and innovative environment.

Work Experience

XYZ Technology Solutions | IT Intern
January 2024 – March 2024

- Assisted in collecting, organizing, and validating business data for internal reporting.
- Created Excel-based reports and dashboards to track productivity and system performance.
- Supported the IT team in documenting workflows, maintaining user accounts, and troubleshooting minor technical issues.
- Collaborated with developers in testing small modules for internal web applications using HTML, CSS, and PHP.
- Gained hands-on experience with database queries using MySQL and assisted in basic SQL report generation.

Projects

JEM Car Rental System
Role: Developer | Technologies: Java (NetBeans), MySQL

Designed and developed a desktop-based car rental management system using Java in NetBeans IDE. The system enables users to add, update, and manage car rental records, including vehicle availability, customer information, and booking history. Integrated MySQL for database management, and implemented input validation and error handling to ensure data accuracy and system reliability.

Click N Cart – Online Grocery Store
Role: Full Stack Developer | Technologies: HTML, CSS, JavaScript, PHP, MySQL

Built a complete e-commerce web application for an online grocery store. Developed key features such as user registration/login, product catalog, shopping cart, checkout system with billing information, and order placement. Ensured secure backend processing with PHP and dynamic UI behavior using JavaScript and CSS for a responsive shopping experience.
